Profile

I am a young, active, and ambitious specialist who strives for continuous growth and improvement of professional skills. I learn new information quickly and easily, as I am always motivated by curiosity and interest in new knowledge and challenges. From a young age, I developed discipline and determination through six years of rock climbing experience, which taught me how to overcome difficulties and pursue goals despite obstacles.

During my studies at college, I received an increased scholarship for high academic performance. I am currently continuing to deepen my knowledge in the field of IT while studying at university. Since August, I have been working as a Database Administrator, where I apply theoretical knowledge in practice and continuously improve my technical skills.

I believe that professional development is a continuous process, so I am always open to new opportunities and ready to put in maximum effort to achieve high results in my career. I enjoy creating new things, solving complex problems, and seeing how my work helps turn ideas into solutions that bring value and satisfaction to others.
